

Standalone Dialer API

API Integration Documentation — cURL, Parameters & Actual Postman Responses

Generated from the supplied Postman Collection v2.1.0

This version includes the saved response examples contained in the exported Postman collection. The response status, response JSON, request parameters, and form-data fields are reproduced from the source file.

1. API Overview

#	API	Method	Status
1	receivecallrequest	GET	200
2	receivedcalldisconnectrequest	GET	200
3	AutoDialRequest	GET	200
4	AutoDialDisconnectRequest	GET	200
5	uploadDesktopAudioFiles	POST	400
6	SendSms	GET	200
7	AIISMS	GET	200
8	InboxSMS	GET	200
9	OutboxSMS	GET	200

1. receivecallrequest

Method	GET
Endpoint	http://localhost:8000/receivecallrequest?waitresponse=false
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/receivecallrequest?waitresponse=false'
```

Query Parameters

Parameter	Value
waitresponse	false

Response

HTTP Status: 200 OK

```
{
  "lastcallno": "917698076142",
  "Callstatus": "Receive Request Accepted",
  "Callduration": "0",
  "Audiofilename": "NA"
}
```

2. receivedcalldisconnectrequest

Method	GET
Endpoint	http://localhost:8000/receivedcalldisconnectrequest?waitresponse=false
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/receivedcalldisconnectrequest?waitresponse=false'
```

Query Parameters

Parameter	Value
waitresponse	false

Response

HTTP Status: 200 OK

```
{
  "lastcallno": "917698076142",
  "Callstatus": "Disconnect Request Accepted",
  "Callduration": "28",
  "Audiofilename": "sajan_917698076142_10-08-2026_01-25-11-PM.mp3"
}
```

3. AutoDialRequest

Method	GET
Endpoint	http://localhost:8000/AutoDialRequest?waitresponse=false&mobilen=7698076142
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/AutoDialRequest?waitresponse=false&mobilen=7698076142'
```

Query Parameters

Parameter	Value
waitresponse	false
mobilen	7698076142

Response

HTTP Status: 200 OK

```
{
  "lastcallno": "7698076142",
  "Callstatus": "Connect Request Accepted",
  "Callduration": "0",
  "Audiofilename": "NA"
}
```

4. AutoDialDisconnectRequest

Method	GET
Endpoint	http://localhost:8000/AutoDialDisconnectRequest?waitresponse=true
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/AutoDialDisconnectRequest?waitresponse=true'
```

Query Parameters

Parameter	Value
waitresponse	true

Response

HTTP Status: 200 OK

```
{
  "lastcallno": "7698076142",
  "Callstatus": "Success",
  "Callduration": "47",
  "Audiofilename": "sajan_7698076142_10-08-2026_01-24-17-PM.mp3"
}
```

5. uploadDesktopAudioFiles

Method	POST
Endpoint	https://apicrm.bonrix.in/uploadDesktopAudioFiles
Authentication	noauth

cURL Request

```
curl --location 'https://apicrm.bonrix.in/uploadDesktopAudioFiles' \
--form 'file=@C:/Users/User/Desktop/recording.wav' \
--form 'tallycallerName=Rahul'
```

Request Body

Field	Type	Value / File
file	file	C:/Users/User/Desktop/recording.wav
tallycallerName	text	Rahul

Response

HTTP Status: 400 Bad Request

```
{
  "timestamp": "2026-08-10T09:51:18.822+00:00",
  "status": 400,
  "error": "Bad Request",
  "path": "/uploadDesktopAudioFiles"
}
```

6. SendSms

Method	GET
Endpoint	http://localhost:8000/SendSms?mobilen=7698076142&text=Hello
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/SendSms?mobilen=7698076142&text=Hello'
```

Query Parameters

Parameter	Value
mobilen	7698076142
text	Hello

Response

HTTP Status: 200 OK

```
{
  "status_code": 200,
  "message": "Sent successfully",
  "phone_number": "7698076142",
  "id": 7
}
```

7. AISMS

Method	GET
Endpoint	http://localhost:8000/SmsMessages?category=all&page=1&page_size=10
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/SmsMessages?category=all&page=1&page_size=10'
```

Query Parameters

Parameter	Value
category	all
page	1
page_size	10

Response

HTTP Status: 200 OK

```
{
  "items": [

```

8. InboxSMS

Method	GET
Endpoint	http://localhost:8000/SmsMessages?category=inbox&page=1&page_size=10
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/SmsMessages?category=inbox&page=1&page_size=10'
```

Query Parameters

Parameter	Value
category	inbox
page	1
page_size	10

Response

HTTP Status: 200 OK

```
{
  "items": [
    {
      "id": 3,
      "direction": "inbox",
      "phone_number": "7698076142",

    }
  ],
  "total": 2,
  "page": 1,
  "page_size": 10,
  "pages": 1,
  "category": "inbox"
}
```

9. OutboxSMS

Method	GET
Endpoint	http://localhost:8000/SmsMessages?category=outbox&page=1&page_size=10
Authentication	noauth

cURL Request

```
curl --location 'http://localhost:8000/SmsMessages?category=outbox&page=1&page_size=10'
```

Query Parameters

Parameter	Value
category	outbox
page	1
page_size	10

Response

HTTP Status: 200 OK

```
{
  "items": [
    {
      "id": 6,
      "direction": "outbox",
      "phone_number": "7698076142",
